Willkommen

Dear Colleagues and Attendees of the 23rd Cochrane Colloquium,

We are thrilled to host the 2015 Cochrane Colloquium in Vienna. This year’s event promises to be one of the largest ever, with a record number of abstracts and workshop submissions and more than 1,000 attendees.

Hosting a Colloquium is an immense responsibility. We have carefully crafted the 23rd Cochrane Colloquium, building upon the combined work of the 22 previous Colloquia, each of which has contributed to the culture of this wonderful event. The tradition of the “Annual Cochrane Lecture” continues at the kick-off of the Colloquium. Ida Sim from the University of California San Francisco will weigh in on the future of evidence-based medicine in the age of information overload. We will also introduce a new series of sessions entitled “Cochrane Stories.” Inspired by students asking us about the impact of Cochrane’s work in real life, “Cochrane Stories” showcase the efforts of Cochrane’s contributors by allowing them to share their personal experiences of their work’s impact, their struggles, the challenges they faced, and the successes they achieved.

If you think about it, the Cochrane Colloquium is the ultimate crowd-sourcing event. Of the 1,000+ persons attending the Colloquium, more than half are actively participating, either as workshop facilitators or by presenting their own work in oral sessions or poster presentations. This incredibly high percentage of active participation may be what makes Cochrane Colloquia unique. It definitely has proven a scheduling challenge! While we strove to keep workshops and oral sessions separate, we’ve also introduced a new style of research presentation – rapid oral presentations. Inspired by the Japanese “Pecha Kucha,” these fast-paced oral presentations will also be given during lunch sessions. We hope you will find these rapid-fire, four-minute talks both stimulating and interesting.

Our host city, Vienna, is not only the city of music but is also famous for its traditional coffeehouses, imperial balls, international receptions, and formal dinners. Get a taste of the city ranked the world’s most liveable for the 6th consecutive year at the Welcome Reception and Gala Dinner. Put on your dancing shoes and waltz through Monday evening with dance lessons, and then join us for Austrian food. We have increased the Schnitzel Evening reservation three times, evidence of your obvious enthusiasm for Austria’s beloved cuisine of breaded, pounded meat.

In addition to the presentations and talks, we hope everyone will find time to indulge in Vienna’s rich cultural offerings. Attend an opera, visit the art museums, or simply stroll through the cobblestone lanes that inspired centuries of well-known scientists, philosophers, and artists like Mozart, Strauss, Semmelweis, Freud, Twain, Wittgenstein, and many others.

Above all, we sincerely hope that when you bid Vienna farewell at the end of the week, you will carry with you memories of a once-in-a-lifetime experience filled with collaborative learning, motivating talks, cooperative work, and an inspiring exchange of ideas in one of the greatest cities in the world.

Danke für Ihr Kommen!

Gerald Gartlehner & Kylie Thaler
2015 Vienna Cochrane Colloquium Co-Chairs
Acknowledgements
Thank you!

Our first note of thanks goes to our funders and platinum sponsors of the 2015 Cochrane Colloquium – The Lower Austrian Health and Social Fund. The state government of Lower Austria has been a committed supporter of Cochrane Austria since our founding in 2010, and we thank them for their enthusiasm and commitment. Similarly, our host institution, the Danube University Krems, Lower Austria, has provided extensive assistance with the organization of the Colloquium over the last 3 years, and we are grateful for this help.

This Colloquium has taken most of our attention in the last year, but we would not have been able to organize it alone. Each member of the staff at the Department for Evidence-based Medicine at the Danube University Krems had a special job organizing an aspect of the social program, and even those not formally involved in organizing were a continuous source of advice and feedback.

In addition, there are many people who have gone beyond the “call of duty” to make this Colloquium a success:

We would like to thank Robert Wolff. As Abstract Co-Chair along with Ursula Griebler, he has sacrificed many weekends and evenings to organize the largest scientific program of any Colloquium. When we invited him in Hyderabad to do this job, likely none of us were quite aware of the enormity of the task we asked him to complete, and we hope his satisfaction at a job well done outweighs his regret over the lost weekends! Likewise, Miranda Cumpston and Jackie Chandler did a tremendous amount of work scheduling the workshop program (with Peter Mahlknecht) and we were always relieved to have their calming e-mails flutter into our inboxes at times of great stress.

We sent more e-mails to Martin Jancyzk than to anyone else involved in this Colloquium! Although the web team had their hands full with the rebranding of all Cochrane websites in 2015, they still managed to find time to help us create a lovely webpage and to carry us through the online submission and registration process. Likewise, the Comms team (Julie Wood, Jo Anthony, Nancy Owens, Holly Millward & Kathlene Weiss) were always willing and able to bounce around ideas and support us with promotion and sponsorship, despite having an enormous workload of their own. Likewise, Juliane Ried and Jordi Pardo Pardo and all the other Central Executive Team members at Cochrane were also excellent sources of advice and support.

We give special thanks to Liz Waters and Rebecca Armstrong, who were responsible for the Public Health themed plenary on Tuesday, October 6. Gerd Antes – a long-time supporter of Cochrane Austria – and Brian Haynes organized the morning plenary on Wednesday, October 7. Chris Mavergames was an excellent source of help and insight in regard to the other plenaries, and we appreciate his advice and help on topics that are close to his heart!

We would also like to gratefully acknowledge the International Advisory Board for their input and help on the scientific program.

With great appreciation, we would like to thank the Mayor of Vienna, Michael Häupl, for hosting the Gala Dinner at the historic city hall of Vienna.

And last but certainly not least, our sincere thanks to all of you, our attendees – for your submissions, your contributions, and your enthusiasm. We are proud to be hosting all of you in Vienna.

Initiative »Tut gut!«, Niederösterreichischer Gesundheits- und Sozialfonds (NÖGUS) / Lower Austrian Health and Social Fund

The “Tut gut!” initiative acts as a hub of health support and prevention in Lower Austria. A variety of programs, projects, and initiatives bring the topic “prevention” into all spheres of life: communities, nursery schools, schools, offices, hospitals, and more. Targeted offers strengthen the personal responsibility of every individual in Lower Austria in terms of their health, and support them on the way to a healthy, more active life.

See for yourself the high-quality programs we offer at www.noetutgut.at and gather innovative ideas for your own healthcare.

The Lower Austrian Health and Social Fund is a strategic and coordinating initiative for public health within the Lower Austrian health system. The fund’s responsibilities lie in planning, supervising, financing, and ensuring quality in health provision in Lower Austria. Within the framework of healthcare reform, NÖGUS serves as the hub of implementing goal-oriented measures in the areas of healthcare promotion, education and training of non-medical healthcare practitioners, the development of indicator systems in the healthcare sector, and the execution of transnational EU projects with neighboring regions or in conjunction with other EU member states.

Cochrane Colloquia do not take any funding from sources with a potential conflict of interest. Therefore, we rely on the generosity of organizations who share our belief in the importance of independent health information. We thank the following organizations for their support of the 2015 Colloquium:

Donau-Universität Krems / Danube University Krems
The University for Continuing Education

Donau University Krems is the only public university of continuing education in Austria. Its courses are specifically oriented toward the needs of working persons. The University is specifically focused on interdisciplinary cross-linking and future-oriented special sectors; it offers courses that combine medicine and management, music and law, or image sciences and new media. Highest quality standards, a scientific, practical approach, and the use of innovating teaching and learning methods are part of all courses offered at Danube University Krems.

Danube University Krems is located 80 km from Vienna – in one of the most beautiful cultural landscapes of Europe known as the Wachau. It has been declared a world heritage site by the UNESCO. The modern adaptation of an erstwhile tobacco factory in Stein, a characteristic industrial building dating back to the start of the 20th century, and the new premises at Campus Krems offer students and teachers an open and motivating environment that promotes innovation. The facilities include modern teaching and research rooms, a library, an auditorium, a cinema, apartments, and a variety of restaurants. www.donau-uni.ac.at
Cochrane exists to inform and improve healthcare decisions. Over the past 20 years, Cochrane has helped transform the way healthcare decisions are made by producing reviews that summarize the best available evidence generated through research.

We are a global independent network of researchers, professionals, patients, carers, and people interested in health. Our work is recognized as presenting an international gold standard for high quality, trusted information. We want to be the leading advocate for evidence-informed healthcare across the world.

Wiley, the world’s leading society publisher, is the sponsor of the Wireless Internet. Wiley’s Global Research business publishes on behalf of more societies and membership associations than any other society publisher, and offers libraries and individuals 1,250 online journals, thousands of books and e-books, reviews, reference works, databases, and more. For more information, visit www.wiley.com.

Wiley is proud to have published the Cochrane Library on behalf of Cochrane since 2003. The Cochrane Library is the single most reliable source of evidence on the effects of healthcare. World-leading Cochrane Systematic Reviews provide high-quality, independent evidence to inform healthcare decision-making. Learn more at www.cochranelibrary.com.
Social security is an important cornerstone in maintaining social cohesion in modern societies. The Austrian social security comprises health, accident, and pension insurance. As an umbrella organization, the Main Association of Austrian Social Security Institutions (Hauptverband der österreichischen Sozialversicherungsträger) is responsible for safeguarding general social security interests and for representing the social security institutions both nationally and internationally.

In order to ensure adequate and appropriate nationwide healthcare, the Main Association of Austrian Social Security Institutions contributes relevantly to the promotion of decision-making based on scientific insights. In the context of evidence-based healthcare, health technology assessment (HTA), in tandem with international networking and cooperation with various institutions, plays a crucial role. As a health policy tool, HTA requires high-quality evidence-based information as provided by the Cochrane Collaboration to support transparent decision-making processes by healthcare politicians, administrators, and clinical decision-makers.

The 23rd Cochrane Colloquium hosted by Cochrane Austria in Vienna provides an excellent opportunity to promote evidence-informed health decision-making in the Austrian healthcare system.

One example is the approval of drugs in Austria, which is based on scientific studies but also on the post-launch surveillance of the effects. Also the admission of new drugs into the reimbursement codex is strictly regulated. We focus not only on treatment of illness but also on health promotion and prevention. We use quality indicators and guidelines as our main tools in our prevention programs, which range from anti-tobacco strategies, including a stop-smoking helpline, up to tertiary prevention. Other examples are the development of national standards of early breast cancer detection based on studies, disease management programs according to clinical pathways (e.g. for type-2 diabetes), and orthodontic treatment when medically indicated (e.g., removable or fixed braces).
Silver

RTI-International

RTI-International is the sponsor of the Colloquium App. As one of the world’s leading research institutes, RTI is dedicated to improving the human condition by turning knowledge into practice. RTI’s staff of more than 3,700 provides research and technical services to governments and businesses in more than 75 countries in the areas of health and pharmaceuticals, education and training, surveys and statistics, advanced technology, international development, economic and social policy, energy and the environment, and laboratory testing and chemical analysis. For more information, visit www.rti.org.

Medizinische Universität Wien / Medical University of Vienna

Founded in 1365 as a medical faculty of the University of Vienna, the Medical University of Vienna is now the largest medical research institution in Austria and one of the world’s largest and most renowned medical universities. The clinics at the Medical University employ over 1,500 doctors and more than 7,000 medical students enjoy world-class education. The Medical University of Vienna has generously sponsored 30 students to participate in and contribute to the 2015 Cochrane Colloquium in Vienna, a sign of its commitment to evidence-based medicine and medical education.

Guidelines International Network

The Guidelines International Network (G-I-N) is a Scottish charity, founded in 2002 to promote and facilitate international networking and collaboration within the guideline community. Since then, it has grown to include 104 organisations and 138 individual members, encompassing 50 countries in six continents. Our aim is to be acknowledged as the connector within the guideline world, and to extend our reach to the wider knowledge management community.

We are proud of our partnership with Cochrane and are looking forward to working more actively together to avoid duplication of efforts of guideline developers and systematic reviewers and achieve our shared goal of bringing our communities much closer together for the benefit of all.

We wish our friends and colleagues at Cochrane every success in the 2015 Cochrane Colloquium in the wonderful city of Vienna. Please drop by the combined Cochrane/G-I-N stand at the Colloquium to find out more about G-I-N, where you will meet Sue Huckson, G-I-N Board Trustee and Chair of G-I-N Membership Committee.

Science Meets Art

Bernhard Mager is our “artist-in-residence”

For the first time ever at a Cochrane Colloquium, science meets art in a blending of colors and forms. We are pleased to welcome local artist Bernhard Mager as our “artist-in-residence” here in Vienna! Mager’s work playfully adapts the human genetic code into an explosion of color. He will be present during the Colloquium to do a live performance, allowing you to take part as he paints an abstract version of the Cochrane Austria logo in oil on canvas. His geometric yet abstract designs will inspire him – and you – to create the very first Cochrane Colloquium piece of art.

You can find more of Bernhard Mager’s work on his website www.bernhardmager.at

With thanks to HYPO NOE Landesbank AG for their support of this project.

RGB, oil on canvas, 180x170cm, 2015
Chairs & Speakers
Colloquium Co-Chairs

Gerald Gartlehner
Kylie Thaler

Gerald Gartlehner is the Director of Cochrane Austria and the founding director of the Department for Evidence-based Medicine and Clinical Epidemiology at the Danube University, Krems. He is also the Associate Director of the RTI-UNC (Research Triangle Institute International—University of North Carolina) Evidence-based Practice Center in Chapel Hill, USA, and a research fellow at the University of North Carolina Sheps Center for Health Services Research. He has more than a decade of experience in systematic reviews and meta-analyses of healthcare interventions. His main professional interests concern comparative effectiveness and safety of medications, advanced methodology for synthesizing bodies of evidence and for dealing with problems of applicability and strength of evidence. He has served as a scientific advisor to national and international organizations such as the Austrian Ministry of Health, the World Health Organization, and the US Consumers Union.

Kylie Thaler is the Associate Director of Cochrane Austria and a research associate at the Department for Evidence-based Medicine and Clinical Epidemiology at the Danube University, Krems, Austria. She obtained her medical degree at the University of Melbourne, Australia and completed her Master of Public Health at the Medical University of Vienna. Her thesis focused on using evidence in public health decisions. She is an experienced systematic reviewer and has worked on multiple projects in cooperation with the World Health Organization, the Evidence-based Practice Centers at the Oregon Health and Science University, and the University of North Carolina, Chapel Hill, as well as with local Austrian and German agencies. Her research focus is systematic review and guideline methodology. She led a work package of a European Union FP-7 funded project on interventions to combat publication bias and is a member of the GRADE working group and a reviewer for the Journal of Clinical Epidemiology.

Plenary speakers

Sunday, 4 October
9:00–10:30
Chairs: Lisa Bero & Gerald Gartlehner

Plenary I:
3rd Annual Cochrane Lecture

We are delighted to announce that Ida Sim will be giving the 3rd Annual Cochrane Lecture at the opening plenary of the 23rd Colloquium.

Ida Sim
is Professor of Medicine at the University of California San Francisco, Co-Director of Biomedical Informatics at UCSF’s Clinical and Translational Sciences Institute, and Co-Founder of Open mHealth. Her work focuses on knowledge-based technologies for evidence-based medicine. She was also the founding Project Coordinator of the World Health Organization’s International Clinical Trials Registry Platform, which sets global standards on trial registration and reporting.

An Apple ResearchKit study enrolled 22,000 people in five days. A study claims that Twitter can be used to identify depressed patients. A computer program crunches genomic data, the published literature, and electronic health record data to guide cancer treatment. The pace, the data sources, and the methods for generating medical evidence are changing radically. What will — what should — evidence-based medicine look like in a faster, personalized, data-dense tomorrow?
Monday, 5 October 9:00–10:30
Chairs: Karla Soares-Weiser & Robert Wolff

**Plenary II:** Information overload: Are we part of the problem or part of the solution?

**John Ioannidis**
holds the C.F. Rehnborg Chair in Disease Prevention at Stanford University, where he is Professor of Medicine, Professor of Health Research and Policy, and Director of the Stanford Prevention Research Center at Stanford University School of Humanities and Sciences, and co-Director of the Meta-Research Innovation Center at Stanford (METRICS).

**Hilda Bastian**
was a consumer advocate in Australia whose career turned to analyzing evidence, communicating about it, and making it more accessible. She now works at the U.S. National Institutes in the National Library of Medicine's National Center for Biotechnology Information (NCBI), where she is responsible for clinical effectiveness resources at PubMed Health and post-publication evaluation at PubMed Commons. Hilda is also a cartoonist and blogger.

**Ben Goldacre**
is a doctor, academic, campaigner, and writer whose work focuses on uses and misuses of science and statistics by journalists, politicians, drug companies, and alternative therapists. His first book, *Bad Science*, reached #1 on the UK nonfiction charts and has sold over half a million copies worldwide. His second book, *Bad Pharma*, discusses problems in medicine, focusing on missing trials, badly designed research, and biased dissemination of evidence.

Tuesday, 6 October 9:00–10:30
Chairs: Rebecca Armstrong & Anita Rieder

**Plenary III:** Sectors, settings, and innovative methods: reshaping the future of public health evidence
In collaboration with the European Forum for Evidence-based Prevention

**Mark Lawrence**
is a Professor in Public Health Nutrition at Deakin University. He has 30 years' experience working in food and nutrition policy at local, state, national, and international levels. Mark's research interests focus on investigating the science and politics of evidence use in nutrition policy-making, particularly in relation to dietary guidelines, Nutrient Reference Values, and food regulations. He is also leading a transdisciplinary research team analysing policy interventions to promote healthy and sustainable food systems.

**Eva Rehfuess**
is a Senior Scientist at the Institute of Medical Informatics, Biometry and Epidemiology at the University of Munich, and coordinates Cochrane Public Health Europe. Nine years of working for the World Health Organization inspired her keen interest in methods for evidence-based public health. Much of her research relates to the evaluation of complex interventions, in particular as applied to household air pollution, child health, and other health concerns in low- and middle-income countries.

**Toby Lasserson**
is a Senior Editor at the Cochrane Editorial Unit in London, UK. He has been involved with Cochrane for over 15 years and has contributed as an author or editor to more than 50 published Cochrane Reviews. Since September 2013 he has led a team of editors in the pre-publication quality assurance of Cochrane Reviews. Toby has also been part of the working groups that developed the standards for conduct and reporting of Cochrane Reviews (MECIR, PLEACS) and contributed to adapting PRISMA guidelines for Protocols, IPD, Harms and Abstracts.
Plenary IV: Clearing the path for research to reach decision-making: How can we make the vision a reality?

Brian Haynes
is Professor of Clinical Epidemiology and Medicine, founding chief of the Health Information Research Unit at McMaster University, and on the active medical staff of Hamilton Health Sciences, Hamilton, Ontario. His main research interests are in improving health and healthcare through enhancing the validation, distillation, dissemination, and application of healthcare knowledge. He is one of the originators of evidence-based medicine and has created a health knowledge refinery that feeds many evidence-based information services such as ACP Journal Club, ACP JournalWise, EvidenceUpdates, Nursing PLUS, Rehab PLUS, and Knowledge Translation PLUS, as well as working tools for authors and editors of evidence-based texts, systematic reviews, and guidelines.

Magne Nylenna
is the Director of the Norwegian Knowledge Centre for the Health Services and Editor-in-Chief at the Norwegian Electronic Health Library. He is Professor of Community Medicine, University of Oslo, and Vice Chair of the Cochrane Library Oversight Committee. His main interest is in scientific communication and publishing. He has been Editor-in-Chief of the Journal of the Norwegian Medical Association and Member of the International Committee of Medical Journal Editors (the Vancouver Group) as well as Chairman of the Membership Committee, World Association of Medical Editors (WAME), and Council Member and Vice President of the European Association of Science Editors (EASE).

Gerd Antes
is the founding director of Cochrane Germany, based at the University Hospital Freiburg, and holds a professorship at the Medical Faculty of the University of Freiburg. His academic background is in mathematics and medical statistics; however, his research interest is in the scientific challenges present at all stages of the knowledge process – from generation to dissemination and implementation. This vision of knowledge as one of the most powerful resources to improve healthcare motivated him to combine his scientific work with activities in the political context of healthcare and to focus on structural barriers between the global knowledge pool in English and local implementation in other languages.

Glyn Elwyn
is a tenured professor and physician-researcher at the Dartmouth Institute for Health Policy and Clinical Practice, USA. After reading the humanities, he qualified in medicine in the United Kingdom and completed his doctorate with Professor Richard Grol in the Netherlands. He leads an interdisciplinary team examining the implementation of shared decision-making into routine settings. His current focus is on the development and impact of Option Grids®, evidence-based encounter tools to foster better clinical conversations. He has developed the Observer OPTION and CollaborATE instruments to measure shared decision-making.

Gerd Gigerenzer
is Director at the Max Planck Institute for Human Development and Director of the Harding Center for Risk Literacy in Berlin. He is former Professor of Psychology at the University of Chicago, and John M. Olin Distinguished Visiting Professor, School of Law at the University of Virginia. He is also Member of the Berlin-Brandenburg Academy of Sciences and the German Academy of Sciences, and Batten Fellow at the Darden Business School, University of Virginia.

Angela Morelli
is an information designer. Over the past ten years, she has focused on designing scientific information and has collaborated with a number of research organizations in Europe. Besides self-initiating projects on communicating environmental issues, she works together with the scientists at the Norwegian Knowledge Centre for Health Services in Oslo and is an Associate Lecturer at Central Saint Martins in London. She believes that understanding does not result from pouring more and more facts onto our audience, but from building narratives in a way that is both clear and engaging. Angela serves as an ambassador for virtual water and water footprint research, and was named a 2012 Young Global Leader by the World Economic Forum. She is co-founder of InfoDesignLab, an initiative whose goal is to facilitate collaborations between designers and scientists. www.angelamorelli.com

15:30–16:00  Messe Congress Center

**Afternoon Break**  Mall area

16:00–17:30  Messe Congress Center

**Newcomers’ session**  Lehár 2

This session is for you if you are new to Cochrane and you are unsure what it is, how it works, and how to get involved. The history and structure of Cochrane will be discussed briefly during this informal session. This is a special session for newcomers to the Cochrane Colloquium and for people who want to hear more about Cochrane.

Facilitators: Peter Mahlknecht, Mala Mann, Jordi Pardo

---

17:45–19:00  Kursalon, Stadtpark Vienna

**Welcome Reception**

Johannesgasse 33, 1010 Vienna

---

You can easily reach the venue by the U4, exit station “Stadtpark”, exit “Johannesgasse”.  

---

23rd Cochrane Colloquium
Imperial Vienna

It might sound like a bit of a fairy tale that a landlocked nation with a population of just 8.5 million people wedged amid eight other countries was once the heart of an empire so grand that “the sun never set.” It’s been almost a century since the Habsburg’s 640 year rule ended, but remnants of Austria’s multicultural empire linger on and can be readily identified as a heritage that distinguishes Austria from its German-speaking neighbors like Germany and Switzerland.

One of the most obvious indicators of Austria’s royal past is the collection of palaces in Vienna. The Imperial Palace in Vienna’s first district, the emperor’s summer palace at Schönbrunn, and the two palaces of the Belvedere (the Upper and Lower Palace) serve as just a few reminders of the city’s grand past.

Like most royal families, the Habsburg liked to collect other treasures as well as palaces. The most impressive of these collections can be viewed at the Imperial Treasury of Vienna (Schatzkammer). In addition to crown jewels, royal robes, and holy lances, you’ll find vestments of the Golden Fleece. Particularly interesting are Habsburg heirlooms, which were often acquired by knights during the Crusades. If you like Dan Brown, you won’t be able to resist these items, including treasures rumored to be a unicorn horn, the Spear of Destiny, and the Holy Grail.

And what good is a fancy royal robe without a beautiful white horse to show it off on? The Spanish Riding School still shows perfect performances of white Lipizzaner horses selectively bred for centuries.

These are just a few of the lingering examples of Vienna’s noble heritage. Take a short stroll through the lanes of the first district, and you are bound to easily find hundreds more.

**ANNUAL GENERAL MEETING**

12:30–14:00  
Meet the Groups

16:00–17:30  
**SPECIAL SESSIONS**

S6  Cochrane Stories – Public health

S7  Describing Interventions

S8  Research funding

**WORKSHOPS**

W20  Knowledge synthesis methods for complex evidence

W7  Economics in Cochrane review protocols 1

W13  Patient-relevant causal effects vs. ITT

W5  Cochrane Commercial Sponsorship Policy

W8  GRADE

W4  Bayesian meta-analysis hands-on in WinBUGS

W6  High-quality data abstraction

W9  Interpreting your review

W12  Interpretable patient-reported outcomes
Vienna 23rd Cochrane Colloquium

10:30–11:00 Messe Congress Center

Morning Break

11:00–12:30 Messe Congress Center

Special Sessions

S1 Complex interventions
Systematic reviews of complex interventions: state of the science on scoping, conceptual frameworks, analytic approaches, reporting elements, and future research

This session summarizes the state of the science on methods for systematic reviews of complex interventions and builds, and continues a dialogue initiated by the Agency for Healthcare Research and Quality (AHRQ) in a symposium in Rockville, Maryland in June 2015.

Chair: Meera Viswanathan
Speakers: Jane Noyes, Mary Butler, Terri Pigott, Peter Tugwell, Meera Viswanathan

S2 Cochrane Stories
The neurominidase inhibitors review – the battle and its aftermath

Cochrane Stories is a new series of special sessions created for the Vienna Colloquium. Cochrane Stories are not scientific presentations of numbers and facts but rather personal stories of struggles, challenges, successes, and maybe failures.

Based on incomplete evidence, governments around the world have spent billions of dollars stockpiling neuraminidase inhibitors (NI) such as Tamiflu® and Relenza® in anticipation of an influenza pandemic. The Cochrane NI Research Group has reviewed more than 160,000 pages of regulatory documents in order to examine the full evidence picture. In this session, you will hear the story behind the Neurominidase Inhibitors Review and its implications.

Chair: Gerd Antes
Speakers: Carl Heneghan & Tom Jefferson
11:00–12:30 Messe Congress Center

Special Sessions

S3 Project Transform
Bringing people and technology together for evidence production

This special session will introduce you to Project Transform, its major objectives, progress to date, and potential impact.

Chairs: Julian Elliott & James Thomas
Speakers: Julian Elliott, Sally Green, Steve MacDonald, Chris Mavergames, Anna Noel-Storr, James Thomas, David Tovey, Tari Turner

Oral Sessions

O1 Diagnostic test accuracy reviews
Lehar 1

- Authors need guidance on creating clinical pathways in Cochrane diagnostic test accuracy systematic reviews
  Gowri Gopalakrishna
- What is the test's accuracy in my practice population? Tailored meta-analysis provides a plausible estimate
  Brian H Willis
- Including Unpublished Data in a Systematic Review of Diagnostic Test Accuracy: Impact on Summary Estimates
  Daniel Korevaar
- A generalized latent variable modelling framework for the bivariate analysis of sensitivity and specificity in diagnostic reviews
  Paolo Eusebi

O2 Information retrieval
Lehar 2

- Improving access to reports of RCTs in Embase: innovative methods enhance the Cochrane Central Register of Controlled Trials (CENTRAL)
  Julie Glanville
- Systematic reviews and meta-analyses of traditional Chinese medicine must search Chinese databases to reduce language bias
  Chen Mao
- Web searching for systematic reviews: how to develop the current guidance on methods and reporting standards
  Simon Briscoe
- The objectively-derived approach enables the development of high-quality search strategies for bibliographic databases
  Elke Hausner

O3 Primary studies
Lehar 3

- Olanzapine for schizophrenia: what do the unpublished clinical trials reveal?
  Jonathan Beaumier
- The association between baseline differences and mortality in trials of atypical antipsychotics in dementia: a meta-regression analysis
  Tessa Hulshof
- Meta-epidemiology of re-analyses of randomized controlled trial data
  Shanil Ebrahim
- Are we overestimating harm when high numbers of placebo patients are switched to active therapy as part of an adaptive trial design? A meta-epidemiological study
  Simon Tarp
### 11:00–12:30 Messe Congress Center

#### Rapid Oral Sessions

<table>
<thead>
<tr>
<th>Location</th>
<th>Location</th>
</tr>
</thead>
<tbody>
<tr>
<td>Schubert 1</td>
<td>Schubert 4</td>
</tr>
</tbody>

**Rapid Oral Sessions**

**RO1** Risk of bias assessment tools

**Chairs:** Anna Glechner & Kun Hyung Kim

- **RO1.1** ACRoBAT-NRSI for public health: reporting on feasibility & utility of applying ACRoBAT to studies of housing improvement
  - Hilary Thomson

- **RO1.2** Assessing the Usability of ACRoBAT-NRSI for Studies of Exposure and Intervention in Environmental Health Research
  - Rebecca Morgan

- **RO1.3** Bias in measurement of adverse outcomes in non-randomised studies
  - Daniela Junqueira

- **RO1.4** Inter-rater reliability of the Risk Of Bias Assessment Tool: for Non-Randomized Studies of Interventions (ACRoBAT-NRSI)
  - Elisabeth Couto

- **RO1.5** PEDro or Cochrane to Assess the Quality of Physiotherapy Trials? A meta-epidemiological study
  - Susan Armijo-Olivo

- **RO1.6** Developing and validating a tool to quantify risk of bias in systematic reviews of genetic association studies
  - Zahra Sohani

- **RO1.7** PROBAST – A risk of bias tool for prediction modelling studies
  - Robert Wolff

- **RO1.8** AMSTAR: helping decision-makers distinguish high and low quality systematic reviews that include non-randomized studies.
  - Beverley Shea

**RO2** Global health: Helping with evidence

**Chairs:** Adrian Hernandez & Gunn Vist

- **RO2.1** What evidence is available and what is required, in humanitarian assistance?
  - Mike Clarke

- **RO2.2** Evidence Aid Resources: improving access to systematic reviews that are relevant to disasters
  - Mike Clarke

- **RO2.3** Reviews in the humanitarian field: adaptation and transparency
  - Eleanor Ott

- **RO2.4** Evidence Aid: Improving the science and evidence base of disaster response – a policy Delphi engagement
  - Mike Clarke

- **RO2.5** Capacity-sharing for improved filtering of information for decision-making in the African context
  - Ruth Stewart

- **RO2.6** Policy BUDDIES: lessons learnt by researchers engaging in “buddying” with provincial policymakers in South Africa to advance evidence-informed decision-making
  - Taryn Young

- **RO2.7** Story of an epidemic – public health evidence South Asia – creating a social epidemic by experimenting with few
  - Streekumaran Nair

- **RO2.8** Use of Cochrane Reviews in developing Clinical Practice Guidelines (CPGs) in Malaysia
  - Siew May Loong Tan

- **RO2.9** Measuring global health inequalities: the Gini, Theil, and Slope inequality index for 291 diseases and injuries and 76 risk factors
  - Peter Von Philipsborn
## Rapid Oral Sessions

**RO3** Advanced methods: Overviews of reviews and network meta-analyses  
Location: Schubert 2-3  

**RO 3.1** What guidance is available for researchers conducting overviews of reviews? A scoping review and qualitative metasummary  
Lisa Hartling  

**RO 3.2** Scoping reviews versus systematic reviews: results from a scoping review of scoping reviews  
Andrea Tricco  

**RO 3.3** Overview of screening recommendations from evidence-based guidelines as decision support for a reoriented parent-child preventive care programme  
Inanna Reinsperger  

**RO 3.4** Completing the first Cochrane overview of stroke reviews: experiences of the Cochrane Stroke Group  
Alex Pollock  

**RO 3.5** Constructing an overview of systematic reviews of diagnostic test accuracy  
Harriet Hunt  

**RO 3.6** Including observational evidence in a network meta-analysis of RCTs: a case study in schizophrenia  
Orestis Efthimiou  

**RO 3.7** Problems with Bayesian random effects in network meta-analysis  
Gordon Guyatt

## Rapid Oral Sessions

**RO4** Quality of reporting  
Location: Schubert 5-6  

**RO 4.1** The PRISMA-IPD Statement: preferred reporting items for a systematic review and meta-analysis of individual participant data  
Lesley Stewart  

**RO 4.2** The Consensus on Exercise Reporting Template (CERT): a Delphi study investigating a standardised method for reporting exercise programs  
Susan Slade  

**RO 4.3** Essential items in reporting diagnostic accuracy studies: 2015 update of the STARD Statement  
Patrick Bossuyt  

**RO 4.4** Quality of reporting of diagnostic accuracy studies in medical laboratory journals  
Valentina Pecoraro  

**RO 4.5** Quality of reporting of clinical prediction model studies: adherence to TRIPOD  
Pauline Heus  

**RO 4.6** Epidemiology and reporting characteristics of systematic reviews: 2014 update  
Matthew Page  

**RO 4.7** Challenges and considerations in assessing the reporting quality of systematic reviews in overviews using PRISMA  
Pengli Jia

**Special Sessions**

**S4 WHO-Cochrane partnership**

*Using evidence in global public health policy: the WHO-Cochrane partnership*

How are Cochrane Systematic Reviews used by the WHO? How do Cochrane contributors inform WHO guideline processes? What can Cochrane do better to increase uptake of its evidence in global public health policy? These are just some of the questions that the cases presented in this session will address.

Of interest to CoEds and others who are keen to increase the use of their hard work and share experiences!

**Chairs:** Lisa Bero, Susan L. Norris

**Speakers:** Lisa Bero, Nicola Magrini, Jörg Meerpohl, Chizuru Nischida, Susan L. Norris, Peter Olumese

---

**S5 Cochrane Stories**

*A controversial Cochrane Review – Mammography screening*

Peter Gøtzsche’s Cochrane report, “Screening for breast cancer with mammography” has been widely cited but also hotly debated. It summarizes the evidence on an emotionally charged topic that is difficult to explain to clinicians and the general public. In this Cochrane story, Ingrid Mühlhauser and Peter Gøtzsche tell about their struggle to steer the discussion about the benefits and harms of mammography screening into the realm of the rational.

**Chairs:** Gerald Gartlehner, Irmgard Schiller-Frühwirth

**Speakers:** Peter Gøtzsche & Ingrid Mühlhauser

### Session RO7: Quality of reporting

**RO7.1** How often is a Cochrane review the best available evidence? A systematic interpretation of more than 2000 Cochrane reviews.

**Authors:** Gabriel Rada, Andrew Herxheimer, Irena Zakarija-Grkovic, and others

**RO7.2** Differences in outcome reporting exist between protocols and published oral health Cochrane Reviews.

**Authors:** Nikolaos Pandis

**RO7.3** Shedding light on the maze of study labels and features of CMA and ITS studies: a systematic analysis.

**Authors:** Stephanie Polus

**RO7.4** Systematic review of adverse effects of antidepressants in healthy volunteer studies.

**Authors:** Andreas Ørsted Bielefeldt

**RO7.5** Agreement in results data between conference abstracts and full reports of randomized controlled trials: should we depend on conference abstracts?

**Authors:** Ian Saldanha

**RO7.6** Methods for data extraction from figures in protocols of Cochrane Systematic Reviews.

**Authors:** Livia Puljak

**RO7.7** Reliability of data extraction using manual measurements of published graphs or figures.

**Authors:** Giordano Pérez-Gaxiola

**RO7.8** A graphical display of reporting factors associated with systematic reviews: an example from diabetic retinopathy.

**Authors:** Elizabeth Clearfield

**RO7.9** Scope and quality of Cochrane Reviews of nutrition-related interventions.

**Authors:** Solange Durao

### Session RO8: Evidence maps and priority setting

**RO8.1** EBRNetwork – a call to action for more efficient systematic reviews.

**Authors:** Mona Nasser

**RO8.2** Evidence gap maps – a tool for promoting evidence-informed policy and prioritising future research.

**Authors:** Birte Snilstveit

**RO8.3** Evidence gap maps for eye health: a tool for promoting evidence and gaps in research.

**Authors:** Bhavisha Virendrakumar

**RO8.4** Accountability and health information systems: from health systems’ priority setting to a pragmatic systematic review.

**Authors:** Natalie Leon

**RO8.5** Evidence gaps in health policy and systems research in 15 countries of the Eastern Mediterranean Region: a mapping exercise.

**Authors:** Fadi El-Jardali

**RO8.6** Establishing and prioritising a local health research agenda with end users.

**Authors:** Darren Moore

**RO8.7** A priority setting tool for prioritizing review questions for systematic reviews in health policy and systems research: development and validation.

**Authors:** Elie Akl

**RO8.8** Priority setting for research and practice of child health in low- and middle-income countries (LMICs) based on evidence from Cochrane Reviews.

**Authors:** Anju Sinha

<td>Making an impact on public health – stories from Evidence Aid and the Cochrane Review on lay health workers</td>
<td></td>
</tr>
</tbody>
</table>

Cochrane Stories is a new series of special sessions created for the Vienna Colloquium. Cochrane Stories are not scientific presentations of numbers and facts but rather personal stories of struggles, challenges, successes, and maybe failures.

Evidence Aid was established immediately following the Indian Ocean Tsunami in 2004. Hear stories about its successes and challenges over the last 10 years from director Mike Clarke. The lay health workers review was a milestone for Cochrane in many ways due to the methodological complexity. Learn about the review and the impact it has had on public health worldwide from two of the authors in person.

Chair: Mike Clarke
Speakers: Mike Clarke, Claire Glenton, Simon Lewin

<td>Making systematic reviews more useable: the challenges of describing interventions and choosing interventions to implement</td>
<td></td>
</tr>
</tbody>
</table>

This session aims to discuss the causes and implications of poor intervention reporting and synthesis in systematic reviews as well as various approaches to dealing with these problems – with the intention of making systematic review evidence more useable. The session is relevant to authors and peer reviewers of reviews and trials, editors of Cochrane groups and journals, and members of the Cochrane Editorial Unit. It will take the format of three short presentations and a facilitated discussion between the presenters and the audience about this problem and potential solutions.

Chair: Sally Green
Speakers: Tammy Hoffmann, Paul Glasziou, Sally Green, Peter Langhorne

This panel, hosted by UAEM (Universities Allied for Essential Medicines, a student-led initiative), will elaborate on the failures of the current R&D system, will propose new models of how to fill the gap (incl. Open Access approaches), and will show how researchers can respond in order to move toward an equitable, accessible, and needs-driven innovation system.

Chair: Alain Amstutz
Speakers: Katy Athersuch, Thomas Deimel, Ellen ’t Hoen, Tim Hubbard

**16:00–17:30 Messe Congress Center**

### Workshops

**W20** Which knowledge synthesis method can be used to answer research questions of complex evidence?
- **Location:** Business Suite 1–2
- **Facilitators:** Monika Kastner, Sharon Straus, Andrea Tricco

**W7** How to include economics in Cochrane review protocols 1: background, objectives, outcome measures, and types of studies
- **Location:** Business Suite 3–4
- **Facilitators:** Erin Graybill, Ian Shemilt, Luke Vale

**W13** Patient-relevant causal effects vs. intention to treat: a guide to understanding complex analyses
- **Location:** Galerie 1–2
- **Facilitator:** Ian Shrier

**W5** Cochrane Commercial Sponsorship Policy: an implementation workshop
- **Location:** Galerie 3–4
- **Facilitators:** Ruth Foxlee & David Tovey

**W8** How to use GRADE to assess, interpret, and present findings of a review
- **Location:** Galerie 5–6
- **Facilitators:** Romina Bignardello-Petersen, Jan Brozek, Miranda Langendam, Nancy Sandesso, Holger Schünemann

**W4** Bayesian meta-analysis hands-on in WinBUGS
- **Location:** Galerie 7–8
- **Facilitator:** Melissa Glenda Lewis & Sreekumaran Nair N

**W6** High-quality data abstraction for systematic reviews: from form development to data exportation
- **Location:** Galerie 9–10
- **Facilitators:** Gillian Gresham, Tianjing Li, Kristina Lindsley

**W9** Interpreting your review: how to avoid Cochrane’s most common major errors
- **Location:** Galerie 11–12
- **Facilitators:** Miranda Cumpston & Toby Lasserson

**W12** Making results of patient-reported outcomes interpretable
- **Location:** Galerie 13–14
- **Facilitators:** Gordon Guyatt & Donald Patrick

**W15** Systematic reviews of prognostic studies 3: design, protocol, and data extraction using the CHARMS checklist
- **Location:** Galerie 15–16
- **Facilitator:** Karel Moons

**W14** Synthesis of qualitative research findings: what are they, where are they, and what to do with them?
- **Location:** Galerie 17–18
- **Facilitators:** Andrew Booth, Kate Flemming, Ruth Garside, Angela Harden, Janet Harris, Jane Noyes, James Thomas

**17:45–19:00 Messe Congress Center**

### Annual General Meeting

- **Location:** Strauss 2–3
Coffeehouses

“... occasionally people even drink a coffee in a coffeehouse, but that’s not the reason one goes there.”

H. Weigl, Austrian writer

Vienna and her coffeehouses are inseparable. At the turn of the century, Vienna boasted over 600 coffeehouses catering to every profession, social class, and mood. Then, as today, writers, business people, students, artists, intellectuals and international guests have come to treasure their time “alone in the company of others.” One Austrian poet in the early 1900s felt so at home in his Stammcafe that he used Café Central as his return address. You’ll find Herr Altenberg sitting there still, opinion-loaded and inspiration-ready at his Stammtisch directly inside the brass doors of the marble-pillared historical gem.

But perhaps you’d prefer something more 50s style like the favored café of Thomas Bernhard (Bräunerhof)? Or maybe you’d like to contemplate dreams and the subconscious along with the memory of Sigmund Freud (Café Landtmann)? Coffeehouses vary in atmosphere and offerings. Some will have chess, piano accompaniment, or singers, some not. But no matter what coffeehouse you choose, all of them will have great coffee.

You will be able to choose from a long list of coffees, and we’re not talking regular or vanilla-flavored. Your coffee will usually come served on a silver platter with a cup of water on the side and usually—though not always—the spoon delicately balanced atop the glass. Newspapers from around the world will be hanging on a newspaper rack, available for your perusal. In attempt to guarantee your time is undisturbed, the server will skillfully ignore you and refrain from slapping down your check until you kindly request he or she do so.

In today’s world of multitasking, need-it-yesterday, working-against-the-clock, don’t you think you deserve some balm for the soul? Allow a black coat-and-tails waiter to serve up a Mélange and afford you a few glorious hours to sit back and smell the coffee.

Text by KC Blau, Vienna expat blogger and fiction writer (www.kcblau.com)

Moving beyond the published article (part 1): regulatory documents as an evidence base for Cochrane reviews

This special session will outline why it is important to think beyond journal publications; it will present examples of systematic reviews including data from clinical study reports and other regulatory documents and will consider the challenges and opportunities of using this source of evidence in Cochrane reviews. This session will provide an opportunity to debate our cross-methods group initiative to develop interim guidance on when to incorporate regulatory documents into Cochrane reviews.

**IBM Watson**

Using IBM Watson to construct semantic models to extract relevant point-of-care information from Cochrane Reviews.

Using Named Entity Recognition technologies contained in IBM Watson products, we are building the ontology of concepts contained in the Cochrane Database of Systematic Reviews: inclusion criteria, participants, interventions, comparisons, and outcomes (PICO), risk of bias assessments, conclusions, and dates. In the future, medical researchers and practitioners will be able to navigate the resulting network using simple queries and natural language queries and access the resulting information using tablets or similar convenient systems of engagement.

**S11 EMA**

The European Medicines Agency in dialogue with Cochrane.

Both Cochrane and Regulatory Agencies work for better healthcare. The structures of the organizations and the mandates are different, but their objectives are the same. An intensified dialogue between both agencies and an understanding of the needs, expectations, and possibilities could save duplicate work and utilize complementary and collaborative efforts. This session aims at promoting a constructive dialogue between Cochrane and the European Medicines Agency.

Chairs: Harald Herkner & David Tovey
Speakers: Hans-Georg Eichler, Stephen Evans, Christoph Male

<tr>
<th>Session</th>
<th>Location</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>S13 Individual participant data</strong></td>
<td>Strauss 2-3</td>
</tr>
<tr>
<td>Moving beyond the published article (part 2): individual participant data from industry and publicly funded trials as the basis for Cochrane reviews</td>
<td></td>
</tr>
</tbody>
</table>

The objective of this session is to describe and explore new opportunities for accessing hitherto unavailable individual participant data and/or aggregate data presented in clinical study reports from clinical trials conducted by industry and public bodies. Reliance on data extracted from published trial reports can miss a large proportion of what lies hidden. This session encourages the Cochrane community to look at ever-increasing new sources of information to guide clinical decision-making.

Chair: Richard Lehman
Speakers: Jennifer O’Callaghan, Joseph Ross, Lesley Stewart, Rebecca Sudlow, Catrin Tudur Smith

**Austrian Food – Schnitzel Evening**

Seats are guaranteed for ticket holders only (don’t forget to bring your € 10 voucher with you). If you do not have a ticket, you may still be able to get a seat in the restaurant, but we cannot guarantee seating.

Prater 116, 1020 Vienna

---

You can easily reach the “Schweizerhaus” by foot from the venue. Go via the Messestraße and then Straße des Ersten Mai. www.schweizerhaus.at
Alpine Water

Look at a menu in any Viennese restaurant and you might be confused by all the choices – prickelnd or mild or still – when all you really want is a normal glass of water. Can you get that here?

The answer is a resounding yes! And it will be some of the best tap water you’ve ever tasted. Promise. Because Vienna has a very high quality of water that comes straight to the city from the Alps in Lower Austria and Styria.

In the 19th century, as Vienna’s population soared, so did the sewage and hygiene problems. In the 1830s, a cholera epidemic broke out, killing 2,000 of the city’s inhabitants. The emperor recognized the need for a better water supply and began expanding the city’s water lines, but the city continued to grow and suffer from cholera and typhoid outbreaks. To combat the problem, construction on the first Vienna mountain water aqueduct began in 1870, and in 1873, Emperor Franz Josef I opened Europe’s most extensive water supply system. By 1888, ninety percent of Vienna’s houses were connected to pipes that supplied clean drinking water and originated in the mountain 100 kilometers to the southwest.

Now, over a century later, Vienna still gets its crystal-clear drinking water from the Alpine springs. The city is so convinced of the superior quality of its tap water that Vienna became the world’s first city to place its water under constitutional protection. Since December 2001, the city of Vienna has protected its liquid treasure for future generations in the Vienna Water Charter because, according to the charter, “Water should not be a luxury item.”

So, yes, drink the tap water here. You will not be disappointed.

### Workshops

- W21: Covidience
- W30: Missing data outcome in trials
- W60: Consumers for the terrified
- W61: Narrative synthesis of quantitative data: public health
- W63: GRADE-CERQual tool
- W64: Core outcome measures
- W65: GRADE IED frameworks
- W66: Harmonising Cochrane content
- W67: Brief economic commentaries for reviews
- W68: Citizen juries’ experience on population screening
- W69: Introduction to meta-analysis 4
- W70: Introduction to ROBIS
- W71: Peer review for Cochrane Reviews
23rd Cochrane Colloquium

9:00–10:30 Messe Congress Center

Plenary III: Sectors, settings, and innovative methods: reshaping the future of public health evidence
In collaboration with the European Forum for Evidence-based Prevention

Chairs: Rebecca Armstrong & Anita Rieder

Reshaping evidence use for public health nutrition
Mark Lawrence

Adopting a systems perspective in public health: methodological implications and stakeholder engagement
Eva Rehfuess

Sustainable, systematic & strategic: moving from assuring quality to improving quality of Cochrane Reviews
Toby Lasserson

10:30–11:00 Messe Congress Center

Morning Break

Mall area

11:00–12:30 Messe Congress Center

Special Sessions

S14 Health data synthesis
From genomics to FitBit: the brave new world of health data synthesis

This session aims to: help participants become familiar with the new sources of health data becoming available for potential synthesis and health decision-making and current approaches to assessing bias and synthesizing disparate data sources, furthermore, to discuss current challenges and activities in synthesizing diverse health data as well as potential opportunities to address these challenges and enable the development of methods and technical approaches for synthesis of diverse health data.

Chairs: Julian Elliott & Jeremy Grimshaw
Speakers: Lisa Bero, Julian Elliott, Jeremy Grimshaw, Ida Sim

S15 Strategy to 2020
Delivering the strategy to 2020: progress on the 2015 targets

This session will include presentations by target leads, followed by discussion. Attendees will come away from the session with a good understanding of the progress Cochrane is making in achieving the strategy to 2020 through the 2015 targets. All colloquium attendees who are interested in Cochrane’s Strategy to 2020 will find this session of interest.

Chair: Lucie Binder
Speakers: Jo Anthony, Chris Champion, Miranda Cumpston, Toby Lasserson, Harriet Maclehose, Chris Mavergames, Charlotte Pestridge, Juliane Ried, Hugh Sutherland, David Tovey, Mark Wilson, Julie Wood

Attended Poster Session #2

Poster, exhibition & networking space
### Special Session

**S16 Cochrane/Wikipedia**
The Cochrane/Wikipedia partnership and the importance of knowledge translation

In early 2014, the IMS Institute for Healthcare Informatics cited Wikipedia as “the single leading source of medical information for patients and healthcare professionals.” Wikipedia is used by 50% to 70% of physicians in clinical practice and has also been reported as the single most used resource by medical students. Not long after this citation was published, Cochrane and the WikiMed Foundation, which oversees Wikipedia’s medical pages, formalized a partnership agreement to improve the evidence base in Wikipedia. This session will showcase some of the knowledge translation initiatives that have developed over the past 18–24 months, as well as provide opportunities to find out more about future plans for the partnership and how to get involved.

Chair: Nancy Owens

Speakers: James Heilman, Holly Millward, Sydney Poore, Juliane Ried

---

**S19 Methods debate**

Inclusion of registered trials only, statistical checks, and power estimation of the meta-analysis will improve the quality of Cochrane Systematic Reviews

Chair: Lisa Bero

Pro: Ian Roberts

Con: Jos Verbeek

---

### Oral Sessions

**O10** Filtering the information overload for better decisions

**Location** Lehar 1

**Chair:** Chris Mavergames & Giordano Pérez-Gaxiola

**O10.1** The Embase project 2: crowdsourcing citation screening

Anna Noel-Storr

**O10.2** A machine learning approach to classifying articles for literature reviews based on titles and abstracts

Sara Steeves

**O10.3** Natural language processing to increase efficiency of systematic reviews: a pilot study

M. Hassan Murad

**O10.4** Evaluation of the priority ranking capabilities of SWIFT (Sciome Workbench for Interactive, Computer-Facilitated Text-mining) software

Ruchir Shah

---

**O11** Rapid reviews and overviews of reviews

**Location** Lehar 2

**Chair:** Sohan Deshpande & Ursula Griebler

**O11.1** An evidence map of studies evaluating methods for conducting, interpreting, and reporting overviews of systematic reviews

Carole Lunny

**O11.2** Rapid review programs to support healthcare and policy decision-making: a descriptive analysis of processes and methods

Julie Polisena

**O11.3** Are 3 days enough to capture the key evidence for HTA documents?

Agustín Ciapponi

**O11.4** Effective treatment options for musculoskeletal pain conditions: a rapid meta-synthesis of current best evidence within primary care

Opeyemi Babatunde

#### RO20 Disseminating evidence

**RO20.1** The development of an evidence-based chronic diseases management resource for health practitioners to use at the point of care  
Hanan Khalil

**RO20.2** Disseminating good evidence for Cochrane Systematic Reviews: practice and experience from China  
Xun Li

**RO20.3** Assessing the impact of bibliographical support on the quality of medical care in patients admitted to an internal medicine service  
Manuela Sarti

**RO20.4** The Ptolemy Project: knowledge translation and equity in East Africa  
Carla Hagstrom

**RO20.5** Use of research evidence in newborn and child health policies and practices in Kenya  
Jamlick Karumbi

**RO20.6** Impact of Cochrane Corners in Portuguese journals  
Rodrigo Sousa

**RO20.7** Best evidence for better practice: using social media to help nurses engage with evidence  
Sarah Chapman

**RO20.8** Dissemination of Cochrane Reviews in social media channels and the influence of “positive” versus “negative” results  
Netzahualpili Delgado Figueroa

**RO20.9** New evidence, new ways to share it, new audiences. Pushing the boundaries with social media  
Sarah Chapman

#### RO21 Systematic review and meta-analysis methods

**RO21.1** How often does an individual trial agree with its corresponding meta-analysis? A meta-epidemiologic study  
Diane Threapleton

**RO21.2** Confounding, effect modification, and the odds ratio: common misinterpretations  
Ian Shrier

**RO21.3** Cross-over trials – are we doing it right? Are they doing it right?  
Sarah Nolan

**RO21.4** How do Cochrane review authors interpret subgroup analyses?  
Marty Richardson

**RO21.5** Is the risk difference really a more heterogeneous measure?  
Ian Shrier

**RO21.6** Small studies are more heterogeneous than large ones: a meta-meta-analysis  
Joanna IntHout

**RO21.7** Evaluation of statistical heterogeneity measures and their precision in systematic reviews with meta-analysis and the impact in their interpretation  
Rafael Eduardo Ruiz Gaviria

**RO21.8** Systematic reviews should explore a priori hypotheses to explain heterogeneity even when I² is low  
Gordon Guyatt

**RO21.9** Adding non-randomized and non-controlled studies to an existing review on the effectiveness of chronic disease management programs for asthmatic patients  
Isabelle Peytreman-Bridevaux
Kunst in Vienna

Vienna’s art scene is as varied as it is extensive. You can spend the morning enjoying the graffiti-filled walls of the Danube Canal and the afternoon contemplating the works of Dürer, Monet, and Klimt. Below are some of the city’s choice locations:

**Upper Belvedere Castle:** Boasting not just The Kiss, but the world’s largest collection of Gustav Klimt paintings, the Belvedere offers the perfect location for works of art.

**Albertina:** View the works of the world’s most famous impressionist and post-impressionist artists such as Monet, Renoir, and Cézanne as well as several Picasso paintings. The Albertina is also home to famous works by Dürer, Raphael, Michelangelo, Bruegel the Elder, Rubens, Warhol, Liechtenstein, and… Well, you get the picture. Tip: buy your ticket online at www.albertina.at and avoid the queue when you get there.

**Leopold Museum:** This is the place for Austrian works of art – Klimt, Schiele, Kokoschka, and more. In addition, the Museum Quarter, where the museum is located, is a great place to chill out and also offers free wireless.

**Vienna Museum of Art History:** Wide marble staircases, intricate floor tile designs, and vibrant ceiling paintings combine to give the museum the grand opulence of the works it houses. Some well-known pieces you’ll find here include Bruegel the Elder’s Tower of Babel, Rubens’ The Four Great Rivers of Antiquity, and Vermeer’s The Art of Painting.

**Secession:** The Golden Cabbage’s founders, a group of young Viennese artists, wanted to make a bold statement with the museum, inside and out, and let the world know they had no intention of painting cherubs and fruit baskets. One of those artists was Gustav Klimt, who contributed the museum’s most famous attraction – the Beethoven Frieze.

**Danube Canal:** Stroll along the Danube Canal and take in both Austrian and international graffiti – from very talented and novice artists alike – featured from the Schottenring subway station (Herminengasse exit) all the way down past Schwedenplatz.

Text by KC Blau, Vienna expat blogger and fiction writer (www.kcbalu.com)

W21 Covidence: Cochrane's new online tool for review production (repeat session)
Facilitators: Anneliese Arno, Agustín Ciapponi, Julian Elliott, Demián Glujovsky
Location: Galerie 3–4

W96 EPPI-Reviewer: an online tool for conducting complex reviews (repeat session)
Facilitators: Sergio Graziosi & James Thomas
Location: Galerie 5–6

12:30–14:00 Messe Congress Center

Lunch Break
Location: Mall & Restaurants

12:30–14:00 Messe Congress Center

Meeting

MEs' Exec Vienna Colloquium Meeting – Part 2
Restriction: Restricted
Location: Galerie 1–2

13:00–14:00 Messe Congress Center

Lunch Rapid Oral Sessions

LRO9.1 Trial registration
Chairs: Anette Blümle & Livia Puljak
Location: Schubert 1

LRO9.2 Comparison of the attention paid to trial registration in the Asia-Pacific region in the last three years
Ka-Wai Tam

LRO9.3 Tuberculosis clinical trial activity on the African continent: an analysis of tuberculosis trials registered on the Pan African Clinical Trials Registry and WHO-ICTRP
Elizabeth Pienaar

LRO9.4 How complete are prostate cancer studies conducted in Germany as displayed in the national trial register of the Deutsche Gesellschaft für Urologie (German Association of Urology)?
Stefanie Schmidt

LRO9.5 Prematurely discontinued randomized trials are frequently labelled “completed” in trial registries: a systematic review
Stefan Schandelmaier

LRO9.6 Epidemiology and reporting characteristics of systematic review protocols
Larissa Shamseer

### Special Session

**S18 Systematic reviews**

Systematic reviews guiding future research: opportunities and challenges

This session will interest members of Cochrane, Researchers, Funders, Policy Makers, Regulators, Publishers, and Sponsors. The session is organized by Mona Nasser and Hans Lund on behalf of the Evidence Based Research Network. It aims to answer the question: how can we ensure that systematic reviews become an integral part of future decisions in funding, conducting, or publishing new research?

Chair: Sally Crowe  
Speakers: Klara Brunnhuber, Hans Lund, Lawrence Mbuagbaw, Mona Nasser, Karen Robinson, Matt Westmore

Time to Have a Ball

Austrians are required to master two skills in life – skiing and waltzing. More than 400 balls take place each year in Vienna, and these balls are host to more than 300,000 guests. Balls are sponsored by occupational groups, trade unions, universities, and interest groups — if you’ve got an interest, Vienna’s got the ball.

With Vienna’s long-time love for balls, it’s not surprising that the man responsible for the popularity of the waltz and known during his lifetime as the “The Waltz King,” Johann Strauss II, lived in Vienna. Thankfully, young Johann rebelled against his father’s demands that he become a banker and went on to compose over 500 waltzes, polkas, and quadrilles during his lifetime. At 60 beats per minute, the Viennese Waltz is one of the fastest types of traditional ballroom dance music.

But fast or slow, dancing can be a challenge for those of us who grew up outside Waltzland. Probably during his stint in Vienna, Mark Twain remarked, “Work like you don’t need the money. Love like you’ve never been hurt. Dance like nobody is watching.” In other words, take heart and join those Austrians on the dance floor. Even if you don’t know how to 1–2–3, 1–2–3, you can still have a great time with the right attitude. But even Austrians won’t turn a blind eye to the one thing that can’t be overlooked for the waltz—and that’s a missing dance partner. Fortunately there’s a fix to that problem as well.

Taxi Dancer to the rescue! For an hourly fee, you can hire your own personal Fred Astaire or Ginger Rogers to help you dance the night away. What first appeared in dance halls in the United States during the early 20th century has gained a revival in Vienna’s ballrooms where the male population can be as depressingly dance-lazy as everywhere else. The Taxi Dancing Darlings are bound by strict codes of behavior but available for all kinds of dance functions. In fact, some of the taxi dancer agencies’ best customers are retirement home residents.

So no excuses. Put on your dance shoes, and 1–2–3, 1–2–3 the night away.

Text by KC Blau, Vienna expat blogger and fiction writer (www.kcblau.com)

Social Program

Welcome Reception

Kursalon, Stadtpark Vienna (Johannesgasse 33, 1010 Vienna) 
Saturday, 3 October 2015, Doors open at 19:00

This charming reception venue situated in the Vienna City Park will enable you to connect with Cochrane Colloquium attendees while experiencing a “taste of Vienna” with delicious foods (standing buffet) paired with white wine from the Wachau Valley and red wine from sunny Burgenland. Don’t miss the strudel filled with either apple or cream cheese.

Originally, the Kursalon was intended to increase the recreational value of the enclosed City Park by offering curative waters to drink. Soon after its completion in 1867, the first concert featuring compositions by Johann Strauss II took place. The Kursalon rapidly became the meeting place for Viennese society, who celebrated the cult of the waltz and joie de vivre.

The organizing committee wishes you a delightful evening with cheerful classical, waltz, and jazz music.

Participants must be registered for this event and present their tickets at the door to gain access. Tickets will be provided upon Colloquium check-in.

The dress code for this event is smart casual.

Originally, the Kursalon was intended to increase the recreational value of the enclosed City Park by offering curative waters to drink. Soon after its completion in 1867, the first concert featuring compositions by Johann Strauss II took place. The Kursalon rapidly became the meeting place for Viennese society, who celebrated the cult of the waltz and joie de vivre.

The organizing committee wishes you a delightful evening with cheerful classical, waltz, and jazz music.

Participants must be registered for this event and present their tickets at the door to gain access. Tickets will be provided upon Colloquium check-in.

The dress code for this event is smart casual.

You can easily reach the venue by the U4, exit station “Stadtpark”, exit “Johannesgasse.”
Waltz Lesson

Colloquium venue – Reed Messe Wien ground floor
Monday, 5 October 2015, 17:45 – 19:00

One-two-three, one-two-three… Practice the oldest and fastest of ballroom dances, the Viennese Waltz, in a 75-minute long lesson. We promise you will leave light-hearted and feel like flying after the Waltz lesson.

If you have registered, please bring your voucher to the Waltz Lesson.

There is no specific dress code. We encourage you to bring shoes that are lightweight with a sole that can slide and rotate without a lot of grip (leather sole, ideally) for the perfect dancing experience.

Austrian Food – Schnitzel Evening

Schweizerhaus (Prater 116, 1020 Vienna)
Monday, 5 October 2015, 19:30

For those who are hungry after the Waltz lesson and for those who want to join the more “gemütliche” (comfortable, relaxed) part of the evening, we have reserved a section at the nearby “Schweizerhaus,” a restaurant firmly embedded in Vienna’s culture and loved by both locals and tourists. There you will be able to choose from a variety of typical Austrian dishes (cold and warm) and sample some of their beer specialities.

If you have registered for this event, don’t forget to bring your €10 voucher to the restaurant. The reservation is limited to 150 people. If you do not have a ticket you may still be able to get a seat in the restaurant, but we cannot guarantee it.

You can easily reach the “Schweizerhaus” by foot from the venue. Go via the Messe-straße and then Straße des Ersten Mai.

www.schweizerhaus.at
Gala Dinner

Wiener Rathaus, Vienna City Hall (Friedrich-Schmidt-Platz 1, 1010 Vienna
Entrance on the side via the Lichtenfelsgasse), Wednesday, 7 October 2015, Doors open at 18:30

Tonight, the City Hall, head office of Vienna’s municipal administration, opens their doors for the Gala Dinner. Enjoy an unforgettable evening with your Colloquium colleagues, glide over the parquet to Waltz music, and keep on dancing the night away to popular tunes spun by our DJ.

The Vienna City Hall was built between 1872 and 1883 in the Neo-Gothic style. Stones from many different regions of the Austro-Hungarian Empire were used in the construction of this magnificent building. Among the architectural highlights of the City Hall are the Grand Staircases that will lead you up to the Festival banquet hall.

Participants must be registered for this event and present their tickets at the door to gain access. Tickets will be provided upon Colloquium check-in.

The dress code for this event is elegant. Please note that the Gala Dinner will end at midnight. Details about the “after party” will be available at the event.

Grand Staircases

The Vienna City Hall is located on the Ringstraße and easily accessible with the underground U2, exit station Rathaus, or the tram line numbers 1, 2, 71 or D. Entrance on the side via Lichtenfelsgasse

Sightseeing Tours & Concerts

Sign up for the sightseeing tours on-site at the registration desk.

Our conference organizing partner, Austropa Interconvention, has paired with us to create a program of options for your free time in Vienna! These organized tours are all scheduled around the main Colloquium program, and you can only book tickets through Austropa.

You can choose between the Anne Anderson Walk – Vienna Highlights, The Third Man Tour, Klosterneuburg Monastery & Wine Tasting, or the Vienna Scenic City Tour & Schönbrunn Palace (Bus Tour). You can also have a look behind the scenes of the Spanish Riding School or the Musikverein (Concert House).

Please refer to the Booking Homepage of Austropa Interconvention for more details:

Prizes & Awards

Anne Anderson Award

Anne Anderson was a contributor to the stream of thinking and effort that gave birth to evidence-based healthcare. She had an active interest in women’s health and contributed to multiple published volumes dealing with this subject. Sadly, Anne died of breast cancer in 1983 at age 46.

Following in the footsteps of Anne Anderson, many outstanding women continue to contribute and inspire other women to improve health knowledge for the good of their communities. Often these women are quiet achievers who might otherwise not be recognized. The goal of the Anne Anderson Award is to recognize and stimulate individuals contributing to the enhancement of women’s visibility and participation in the Cochrane leadership. The award is given to a Cochrane member who has contributed meaningfully to the promotion of women as leaders and contributors to the organization.

Past or current active women members of Cochrane are eligible for the award. Consideration is also given in the selection process to the nominee’s contribution to or enhancement of women’s visibility within Cochrane, participation in Cochrane and other leadership activities, and other accomplishments within the context of Cochrane.

The recipient receives a plaque from Cochrane honoring her contributions. The cash award of US$3000 will be designated by the recipient to assist a woman from a low-resource setting with Cochrane activities, who should provide a brief written report on how the funds have been used.

Thomas C Chalmers Award

Tom Chalmers (1917–1995) was an outspoken advocate of randomized trials and is perhaps best known for the notion “randomize the first patient.” His belief was that it is more ethical to randomize patients than to treat them in the absence of good evidence.

The Thomas C Chalmers Award is given at each Cochrane Colloquium to the principal author of both the best oral and the best poster presentation addressing methodological issues related to systematic reviews given by an early career investigator. The presentations must demonstrate originality of thought, high-quality science, relevance to the advancement of the science of systematic reviews, and clarity of presentation.

Presentations are judged by the Thomas C Chalmers Award Committee during the course of the Colloquium, and the two recipients receive a certificate and US$500 each.

Chris Silagy Prize

Chris Silagy (1960–2001) was the founding Director of the Australasian Cochrane Centre, a former Chair of the Cochrane Steering Group, and was instrumental in Cochrane’s development and success.

Chris requested that this Prize be used to recognize contributions to Cochrane in ways that are often insufficiently recognized; for example, providing administration, management, Colloquium organization, and communication and motivation – in short, the “glue” that helps keep Cochrane together.

The Chris Silagy Prize is awarded at every Cochrane Colloquium to an individual who has made an “extraordinary” contribution to Cochrane’s work.

The Prize consists of AUD$1000 (drawn from the Chris Silagy Memorial Fund), a certificate that includes the words “for an extraordinary contribution to the work of The Cochrane Collaboration,” and expenses associated with attending the Colloquium.
Bill Silverman Prize

William (Bill) Silverman (1924–2004) was one of the founders of American neonatal medicine. However, he often evoked somewhat contradictory responses amongst his colleagues because he was in the habit of raising troubling questions about the scientific basis and ethics of his and their practices. He believed that criticism helps drive progress. Furthermore, he believed that criticism should not be limited to examining the work of others, but should also include self-criticism. The Bill Silverman Prize explicitly acknowledges Cochrane’s value of criticism with an emphasis on helping to improve Cochrane’s work and thus achieve its aim of helping people make well-informed decisions about healthcare by providing the best possible evidence on the effects of healthcare interventions.

The criteria for the Prize are that the publication or presentation has evaluated any aspect of the preparation, maintenance, or dissemination of Cochrane Reviews or Cochrane’s work more generally, and: is of high quality; is accompanied by constructive suggestions on how the relevant aspects of the work of Cochrane could be improved; and has had, or is likely to have, a positive impact on the scientific quality, relevance, and use of Cochrane Reviews.

The Prize consists of a certificate and US$1000 to the corresponding author of the selected publication or presentation.

Kenneth Warren Prize

Kenneth Warren (1929–1996) was one of the first people to draw attention to the need for valid summaries of key research studies and to the way that electronic media could be used to disseminate the results of health research relevant to people in developing countries. Dr. Warren was a source of encouragement and support for many young people, particularly those living in developing countries.

The Kenneth Warren Prize is awarded annually to the principal author who is a national living in a developing country and has published a Cochrane Review that is judged to be both of high methodological quality and relevant to health problems in developing countries.

Cochrane Stories

Cochrane Stories is a new series of special sessions created for the Vienna Colloquium. Cochrane is in a period of transition. We are looking forward and setting ourselves goals. We have even changed the way we appear to the world. But the fundamental building blocks that make up Cochrane are our successes – that we exist, what we have created, and the various impacts we have made. Many of us know these “stories,” but we don’t get many chances to tell them.

The Vienna Colloquium is one of the largest ever. Many visitors to the Colloquium this year are new to Cochrane. We asked our non-Cochrane colleagues in Austria, “What do you want to hear about at the Colloquium?” and they answered, “We want to know who you are, what you do, and why you do it. Why is this all so important?”

So we decided to tell them! We have invited three groups of Cochrane contributors to tell their stories. And there are plenty more left for future Colloquias—we know! The three “Cochrane Stories” sessions this year are on neuraminidase inhibitors (Tamiflu®, Relenza®), mammography screening, and Evidence Aid / public health. Cochrane stories are not scientific presentations of numbers and facts but rather personal stories of struggles, challenges, successes, and maybe failures. We invite you to attend, listen, be entertained, and enjoy.
We have classified our program of oral sessions, posters, and workshops into categories that might be of specific interest for attendees.

### Streams

#### The basics (workshops)

These workshops are designed to give you a fundamental introduction to the various methods of systematic reviews, including searching, assessing risk of bias, using the RevMan software, the new Covidence tool, and to GRADE/Summary of Findings tables.

**Sunday, 4 October 11:00–12:30**  
Workshop W21: Covidence: Cochrane’s new online tool for review production (repeat session)  
Galerie 3–4

**Sunday, 4 October 16:00–17:30**  
Workshop W6: High quality data abstraction for systematic reviews: From form development to data exportation  
Galerie 9–10

Workshop W8: How to use GRADE to assess, interpret and present findings of a review  
Galerie 2–6

Workshop W10: Introduction to meta-analysis 1: basic ideas for novices  
Lehar 2

Workshop W18: Using the Cochrane RCT Risk of Bias Tool in Systematic Reviews  
Schubert 2–3

**Monday, 5 October 11:00–12:30**  
Workshop W21: Covidence: Cochrane’s new online tool for review production (repeat session)  
Galerie 3–4

**Monday, 5 October 14:00–15:30**  
Workshop W32: Introduction to meta-analysis 2: meta-analysis of binary and continuous outcomes  
Schubert 1

Workshop W37: RevMan 5 for new and prospective Cochrane authors – Learn how to use the software  
Galerie 13–14

Workshop W41: Using the new online GRADEpro to create “Summary of Findings” tables  
Lehar 3

**Tuesday, 6 October 11:00–12:30**  
Workshop W21: Covidence: Cochrane’s new online tool for review production (repeat session)  
Galerie 3–4

Workshop W69: Introduction to meta-analysis 4: meta-analysis of time-to-event data  
Schubert 1

Workshop W72: Searching for studies for inclusion in Cochrane reviews: an introduction  
Galerie 13–14

**Wednesday, 7 October 11:00–12:30**  
Workshop W21: Covidence: Cochrane’s new online tool for review production (repeat session)  
Galerie 3–4

**Non-randomized designs**

**Sunday, 4 October 16:00–17:30**  
Workshop W78: ACROBAT-NRSi (A Cochrane Risk Of Bias Assessment Tool: for Non-Randomized Studies of Interventions) for non-clinical community based studies: a participatory workshop using a worked example from public health  
Schubert 4

**Monday, 5 October 16:00–17:30**  
Workshop W62: Assessing bias due to confounding in a Cochrane systematic review which includes non-randomised studies of an intervention (NRSI)  
Galerie 17–18

**Wednesday, 7 October 14:00–15:30**  
Workshop W43: Assessing bias in selection of participants into the study in a Cochrane Review, that includes non-randomised studies of an intervention (NRSI)  
Galerie 17–18

Wednesday, 7 October 14:00–15:30
Special Session 17: Rapid reviews Strauss 2–3
Vienna’s dark past

Thirty years after his rejection from the prominent Art Academy in Vienna, Adolf Hitler stood on the balcony overlooking cheering crowds at Vienna’s Heldenplatz and declared, “As leader and chancellor of the German nation and Reich, I announce to German history now the entry of my homeland into the German Reich.” Just eight months later during the November pogroms, 6,547 Jews in Vienna were arrested, thousands of Jewish-owned shops plundered, and 42 synagogues and houses of prayer were set aflame. As Hitler’s master plan progressed, the arrests and atrocities against his declared enemies of state (Jewish citizens, social democrats, gays and lesbians, Roma and Sinti, communists, Jehovah Witnesses, and those considered “socially deviant”) escalated, and those who could not escape were sent off to concentration camps.

At the same time, the Allied Forces fighting Hitler were drawing up the blueprints for a post-war Europe. At a meeting in Moscow in 1943, they determined that Austria should be re-established as an independent state and that Austria was the “first victim of Hitlerite aggression.” Whether or not the Austrians of that time were victims or perpetrators is a question that still continues to haunt the city to this day.

Throughout the city you can still find evidence of both—from brass plaques detailing the names and dire fates of residents who lived in apartments taken over by the Nazis to the “O5” symbol inscribed on the wall of St. Stephan’s Cathedral, showing the mark of the Austrian resistance movement. At Judenplatz in Vienna’s first district, you will find a Holocaust Memorial for the 65,000 Austrian Jews who were murdered during WWII, and at Morzinplatz, a memorial dedicated to the opponents to the Nazi regime who were tortured and killed at the Hotel Metropol that once stood there and served as the headquarters of the Gestapo.

Vienna – Not just a Great Place to Visit, a Great Place to Live too

Austrian composer Gustav Mahler once said that when the world ends, he’ll move to Vienna because everything there happens 50 years later. Today, however, Vienna’s ability to keep up with the pulse of the times with Life Balls, pride parades, city rock festivals, guerrilla gardening, parkour meet-ups, and more, make it not only a great place to visit, but also to live.

You may wonder, however, why the global consultancy company, Mercer, has ranked the city number one for six consecutive years. Well, have a look at some stats used to compare countries on If It Were My Home (www.ifitweremyhome.com) to get an idea. In Austria, I can enjoy 10.2% more free time, spend 39.2% less on healthcare, and live a whopping 0.6 years longer than I would back home in the US. On the downside, I’ll probably earn 19.3% less money. But with free public universities, universal healthcare, and a public transportation system that charges just 1€/day for annual tickets, who needs more money? With acres of parks, open-air cinemas, and free public lectures, there is plenty you can do here on a small budget. Of course, if money’s not an issue, you can also indulge your art, culture, and culinary desires. And when you just need a break from it all, Vienna makes that easy too.

The city’s location in the heart of central Europe and superior rail and air access make quick holidays abroad relatively easy and inexpensive. Bratislava? 1.5 hours by hydrofoil. Budapest? Less than three hours by train. Venice? Less than 6 hours by car. London? Less than 2.5 hours by plane. You get the picture.

Since the end of WWII, Vienna’s official geopolitical stance as the capital of a neutral country in the heart of Europe has made the city the ideal location for international organizations such as OPEC, the OSCE, and the United Nations. This in turn has made Vienna a hub for espionage. Nowadays, however, Vienna is not just for 007’s eyes only. Students, international companies, and folks from every corner of the world are moving in. Gustav Mahler may have wanted to wait for the end of the world to move to Vienna, but everyone else is coming long before then.

Text by KC Blau, Vienna expat blogger and fiction writer (www.kcblau.com)

General information

Colloquium App
All the information regarding the program will be available on our Colloquium App, sponsored by RTI-International. You can download the App from the App Store or Google Play or use the QR code for download.

The Colloquium App has a variety of useful functions. The App will be up to date with any changes to the schedule, including room and time changes. In addition, you will be able to find all abstracts linked to the oral and poster presentations and workshops in the App. Evaluations of oral sessions and workshops will also be carried out directly within the App. What’s more, the App will have a networking function – you can easily send messages to anyone who downloaded the App and make appointments for spontaneous meetings. Need reminders? The Colloquium App has you covered! You can choose to get notifications and updates of your personal schedule within the App.

Wireless Internet
Wireless Internet will be available free of charge at the Congress Center, thanks to our sponsor, Wiley. Username: ColloquiumVienna Password: WiFibyWILEY

The City of Vienna provides several free wireless hotspots. Many coffeehouses also offer free wireless Internet. You can check for wireless Internet in Vienna here: www.wlanmap.com

Twitter
#CochraneVienna

Networking Spaces
The poster, networking, and exhibition space on the ground floor directly after the entrance is equipped with tables and chairs that are available for anyone who wants to sit and discuss collaborations, projects, or plan what to do and see in Vienna. Additional tables are available next to Lehar 4, where the Meet the Groups Posters are situated. Feel free to use this space! This meeting and networking space will be available on demand during the Colloquium from 07:00 am to 19:00 pm. Posters and exhibition booths are also located in this area.

Cochrane Library Access
During the Colloquium, Wiley-Blackwell offers free access to the Cochrane Library in all venue locations.

Breakfast
Please be aware that breakfast is not provided at the Colloquium. Please make other arrangements such as buying breakfast foods or arranging breakfast with your hotel. The first refreshments will be served at 10:30. Coffee will be served for those having early morning meetings (07:30–08:45).

There is a McDonald’s in the near vicinity of the Messe, where you can buy coffee and breakfast.

Registration / Information
Please check in at the registration desk when you arrive at the Colloquium Venue (Reed Messe). The Registration Desk is located directly at the entrance of the Messe and will be staffed from 07:00 to 17:00 from Saturday, 3 October to Wednesday, 7 October. On-site registration will not be possible.

Name Badges
Identification badges are required for admission to all sessions and meals. Please wear your badge at all times. Social event tickets that are included in your conference bag must be presented to gain entry to each respective event.

Lost and Found
Please check with the registration desk regarding any lost or found items.

Message Board
Is located directly at the entrance next to the registration desk. You may also post messages for other attendees on these boards or use the Colloquium App to get in contact with other delegates.

Ticket Exchange for Gala Dinner, Austrian Food – Schnitzel Evening, and Waltz Lessons
Is located at the registration desk. Anyone who does not want or need his/her ticket to any of the social events can hand it in here, and we will give it to a person on the waiting list for the event.

Conference Organizers
Will be recognizable by their name badge and a Cochrane cyan-blue scarf. The local organizing Committee Office is located on the top floor near the Business Suites. Volunteers will also be recognizable by their T-shirts and name badges and can help you with any query.

Speaker Preparation Room
Is located on the ground floor at the data center/media lounge. Speakers can hand in their presentation for upload, run through their talk, and store their personal items in this room.

We request that all speakers (plenary, special sessions, oral, short oral, and workshops) bring their presentation to the speaker preparation room at least two hours before the session commences and provide a copy of the presentation to the technical staff.
Oral and Rapid Oral Sessions

Oral and rapid oral presentations will be held simultaneously in 9 rooms on Sunday from 11:00–12:30, and 14:00–15:30 and on Monday and Wednesday from 11:00–12:30. Rapid oral sessions will be held simultaneously in 4 rooms during lunchtime on Sunday, Monday, and Wednesday from 13:00–14:00.

Long oral sessions will consist of 4 talks of 15 minutes each with 5 minutes for questions. Rapid oral sessions will consist of a maximum of 9 talks (or 6 talks during lunchtime) of 4 minutes each with 3 minutes for discussion. Each session will be moderated by 2 chairpersons.

Poster Sessions

There will be two poster sessions of approximately 150 posters each displayed in the poster, networking, and exhibition space on the ground floor. Posters will be grouped thematically, and each will have a unique ID number.

**Poster session #1** will take place during the morning break (10:30–11:00) and afternoon break (15:30–16:00) on Monday, 5 October.

**Poster session #2** will take place during the morning break (10:30–11:00) and afternoon break (15:30–16:00) on Wednesday, 7 October.

Posters should be in place by 09:00 am at the latest, and preferably on display the day before. Please take your poster down by 19:00.

Wheelchair / Disabled Access

The Messe is completely barrier-free. Disabled restrooms are located on each level of the Messe. The Vienna Town Hall, site of the Gala Dinner as well as the Kursalon, site of the Welcome Reception, are both wheelchair accessible.

Certificate of Attendance

The certificate of attendance will be available at the registration desk. It will be handed out during the Colloquium.

Evaluation forms

Evaluation of all workshops, sessions, and plenaries can be completed through the Colloquium App or online after the Colloquium.
Vienna is Austria’s capital city and is famous for its culture and architecture. Vienna in fall is particularly beautiful as the chestnut leaves turn golden and the sunsets invite visitors and residents alike to take evening strolls in one of the many parks or in the historic center of the city.

**Banks, currency & credit cards**

The currency used is the Euro (EUR / €). Banks and exchange bureaus will change money and travelers cheques, as will some hotels. Normal banking hours are Monday to Friday from 08:00 – 12:30 and 13:30 – 15:00 with longer opening hours on Thursday (until 17:30). In the first district, most banks are open throughout the day without a break. Major banks are open throughout the day without a break. Major

**Pharmacies**

Pharmacies are called “Apotheke” in German and are open Monday to Friday, 08:00 – 18:00 without a midday break. On Saturdays, hours are from 08:00 – noon. Outside of these hours there is a 24/7 on-call service – you will find a note with further details in or outside any pharmacy. For information on night and Sunday service, please call +43 1 452 70 78.

**Emergency numbers**

Euro-Emergency number (police, fire, ambulance): 112

In case of poisoning:
+43 1 406 43 43

ViennaMed Doctors

Hotline for visitors (0–24 hrs):
+43 1 513 95 95

Night and weekend service dentist: +43 1 512 20 78

**Electricity**

Austria’s electrical current is 220–240 volts (US/Canada are 110–120 volts). Electrical sockets (outlets) are one of the two European standard types: type “F” German style Schuko and type “C” Europlug. If your appliance’s plug does not match the shape of these sockets, you will need a travel plug adapter. Travel plug adapters simply change the shape of your appliance’s plug to match whatever type of socket you need to plug into. Travel plug adapters do not change the voltage, so the electricity coming through the adapter will still be the same 220–240 volts the socket is supplying. North American sockets supply electricity at between 110 and 120 volts, far lower than in most of the rest of the world, and appliances are generally only built for 110–120 volts. Please check whether your appliance is compatible with the higher voltage before attempting to plug it into Austrian outlets!

**Smoking**

Smoking is permitted in public spaces and in designated areas in restaurants and cafés. Smoking will be fully banned in restaurants in Austria in 2018.

**Fire and police**

Vienna has an efficient and inexpensive public transport system. Underground trains run daily from 05:00am until midnight and all night on Fridays and Saturdays. Buses and trams operate shorter hours; however, a night-bus system is in operation. Bus / Underground / Tram tickets are € 2.30 one-way or € 16.20 for a weekly pass, and can be purchased in any Underground station from automatic machines that operate in English. Visit the homepage of the Vienna public transport system to book your journey:

http://www.wienlinien.at

**Personal safety**

Austria is one of the world’s safest destinations, but basic safety precautions should be taken at all times. There is a relatively low crime rate, but please take precautions such as keeping valuable items out of sight and locking doors and vehicles. Avoid walking around in unoccupied or poorly lit areas, and pay attention for pickpockets in crowded places, such as public transport or department stores. It is advisable to carry only the cash you will need for each day, just as you would in any major city.

**Drinking water**

Vienna is probably the only major city in the world that provides crystal-clear mountain spring tap water for its residents. Since 1873, a 120 kilometer long aqueduct has supplied the city with Alpine spring water. Therefore, Vienna’s tap water is clean, safe to drink, and of outstanding quality. Use the water bottle from your conference bag to enjoy the Wiener Wasser.

**Payment services Austria**

Payment services

**Language**

German is Austria’s official language. English is widely spoken in tourist areas.

**Disabled access**

The law requires new buildings to provide access for people with disabilities, but please check when booking. All venues of the Colloquium and the two major social events have wheelchair access. If you are unsure, please visit the registration desk.

**Transport**

Vienna has one of the most efficient public transport systems in the world. Underground trains and trams operate shorter hours; however, a night-bus (in English) from your home country if you are a citizen of the European Union or an International Driver’s Permit.

**Tipping**

Gratuities are not automatically included in the average restaurant bill. The standard tip is 10 percent of the bill. Tipping in service-oriented businesses is up to the person paying, but it is generally expected. In casual outlets such as sausage stands or ice parlors, people will often round up to the next full euro, e.g., if the price is € 2.40, you could round up to € 3.00.

**Weather**

October weather is perfect for walking through the streets of Vienna and exploring its many shops and markets. The average temperature in October is 15 °C, ranging from 7 °C – 18 °C. The city generally experiences an “Altweiber-Summer” (a term used to describe a string of warm, sunny days) from mid/late September to early/mid-October.

**Taxes**

VAT is charged at 10% for foods, and 20% for beverages and most other goods and services.

**VAT**

VAT is charged at 10% for foods, and 20% for beverages and most other goods and services. As you would in any major city. VAT is charged at 10% for foods, and 20% for beverages and most other goods and services. As you would in any major city.
Europcar takes you to the Cochrane Colloquium Vienna.

Europcar Austria is the official Cochrane Colloquium car rental partner and has stations throughout Austria.

Car rental is the best option, particularly if you want to do day trips around Vienna or if you have booked a hotel outside Vienna. We are very proud that we will support over 1,000 participating practitioners, researchers, policy makers and journalists with our cars.

Information & reservation:
europcar.at/cochrane
